A reliable and secure supplier, INDEVCO Group has effectively served the hygiene converting industry since 1972. Our product portfolio consists of converting machinery, placement and CNC parts; raw materials, corrugated and flexible packaging for personal care disposables and household tissue products. In addition, we produce private label products, such as anti-bacterial liquid soap, wet wipes, and hand sanitizer gel for brand extension.

Our warehousing and logistics gateways in England and the US help us combine shipments of different products and offer JIT delivery to Europe and North America, eliminating shortage or overstock at customer warehouses. Sourcing polymers from suppliers in close proximity also allows us to offer competitive prices. Today, INDEVCO Group's over 43 manufacturing plants in 9 countries export to 80 countries.
